

Job Description - AI Engineer

Type: Full-Time - Remote

Level: Fresher - Junior

Salary: max 1000\$ Gross

Job Overview

We are looking for a ****Machine Learning Engineer**** to join our team. You will work on exciting AI projects, such as building chatbots, working with large language models (LLMs), and creating Retrieval-Augmented Generation (RAG) systems.

What You Will Do:

- Build and train machine learning models, especially for natural language tasks.
- Fine-tune and work with large language models like GPT, LLaMA, etc.
- Develop chatbot features and smart conversation flows.
- Build RAG pipelines using vector databases and embeddings.
- Improve model accuracy and performance.
- Work with the engineering team to bring AI models into real products.

What We're Looking For:

- Strong Python skills.
- Experience with ML tools like PyTorch or TensorFlow.
- Good understanding of NLP (tokenization, transformers, embeddings...).

- Experience working with LLMs (via API or self-hosted models).
- Familiar with RAG and vector search tools (like FAISS).
- Able to work in a team and solve technical problems.
- Good English

Nice to have:

- Experience with LangChain, LlamaIndex, or similar tools.
- Knowledge of Docker, APIs, or deploying models in production.
- Interest in chatbots and real-world AI applications.

Remarks

We offer a number of benefits to our team members including:-

- Performance review and salary adjustment once a year
- Monthly team-building activities
- Company-sponsored social events and gatherings
- Chance to become team leader if you could demonstrate strong leadership skills
- Company trip
- 13 Month Salary
- Insurance

Selection Process:

- Round 1: CV's screening (Send your CV to ly.nt@hodfords.com / hr@hodfords.com)
- Round 2: English communication Skill (English) & Technical interview (Vietnamese)
- Round 3: BOD

If you have any questions about this position you can call Ms Ly Nguyen at +84 974 414 114 or mail ly.nt@hodfords.com for further information.
